PROFILE

Data Engineering student at **ENSIAS** (graduating in 2027), seeking a **final-year internship (PFE) starting in February 2027**. Has hands-on experience delivering scalable data platforms, cloud pipelines, and production LLM/RAG solutions. Focused on turning complex data infrastructure into high-impact business insights to support strategic and executive decision-making.

EDUCATION

Engineering Degree in Data Engineering & AI ENSIAS, Ecole Nationale Supérieure d'Informatique et d'Analyse des Systèmes, Rabat • Key subjects: Distributed Systems, Cloud Computing, Data Warehousing, Applied ML, Big Data Analytics	2024 - 2027
DEUST in Mathematics, Informatics and Physics Universite Sultan Moulay Slimane, Beni Mellal, With Honors	2022 - 2024

PROFESSIONAL EXPERIENCE

AI Data Engineering Intern D&A Technologies, Casablanca, Morocco • Designed and deployed an enterprise AI & Analytics Portal (microservices), centralizing core KPIs and streamlining executive reporting cycles across departments. • Engineered automated ingestion pipelines following a medallion architecture (PostgreSQL), breaking data silos and enforcing data quality governance. • Delivered a business-facing NLP/LLM chatbot enabling cross-functional stakeholders to query operational databases in natural language without writing SQL.	July 2026 - August 2026
Data Scientist Intern 3D Smart Factory, Rabat, Morocco • Built an industrial defect detection system (ResNet18/PyTorch, MVTec AD) paired with a Streamlit interface, optimizing real-time quality control workflows. • Integrated Generative AI to auto-generate contextual root-cause diagnostic reports, accelerating corrective action and operational response times.	2025

FEATURED PROJECTS

Streamify, End-to-End Data Warehouse & Analytics Platform SQL Server, Medallion Architecture, Power BI, Python, Scikit-Learn • Modeled a Star Schema (5 dims, 2 facts); built an executive Power BI dashboard tracking MRR and cohort churn to directly steer retention and growth strategies. • Integrated customer churn prediction and recommendation algorithms from raw CRM/ERP data to power proactive business retention campaigns.	2026
Azure Cloud Data Pipeline Azure Data Factory, Databricks (PySpark), ADLS Gen2, Power BI • Architected an end-to-end cloud pipeline on Azure ingesting and transforming consumer transactions for enterprise-scale Power BI reporting. • Optimized distributed PySpark transformations on Databricks clusters, cutting processing runtimes and cloud compute overhead.	2026
RAGinstein: Hybrid Search Engine Python, Gemini API, ChromaDB, BM25, TF-IDF • Engineered a hybrid retrieval system combining dense vector search with BM25 keyword matching to maximize search relevance on complex technical documentation. • Integrated Gemini API to synthesize grounded, citation-backed answers, mitigating hallucination risks for decision-critical research.	2026

LEADERSHIP AND COMMUNITY

Active Member , CINDH ENSIAS (Humanitarian Action Club) • Participated in socio-medical caravans and rural development initiatives (well-digging, school renovations).	2025 - Present
Data Cell Lead , Neurodynamics Club, ENSIAS • Organized hackathons, mentored student data projects, and led hands-on technical workshops.	2025/2026
Founding Member , ENSIAS Wellbeing Community • Co-launched the initiative and organized ENSIAS's first student mental health and wellness workshop.	2025 - Present

CERTIFICATIONS

Microsoft Certified: Fabric Analytics Engineer Associate (DP-700)	2026
AWS Certified Cloud Practitioner , Amazon Web Services	2026

SKILLS

Data Engineering: Python (Pandas, PySpark), SQL, Java, Apache Spark, Kafka, dbt, Airflow, Power BI, PostgreSQL
Cloud and DevOps: Microsoft Fabric, AWS, Azure (ADF, Databricks, ADLS Gen2), Docker, Kubernetes, Git, CI/CD
ML and AI: Scikit-Learn, MLflow, LangChain, LLMs/RAG, PyTorch
Languages: French (Native) · English (B2)
